

Please Stop the harrassment of sattelite radio. The NAB only wants to force the public to listen to there commercial overloaded stations. It was due to the ever increasing amount of comercials that caused me to look into XM service. It has been such a great innovation. The only time I actually listen to "radio" is when I rent a car and they are out of vehicles that have XM service. On regular radio (and you know this) they tell you that traffic or weather will be up next... after 5 minutes of screaming commercials, another song, and the dj running his mouth about how great he is! Sattelite radio is such a great service, it,s worth the \$10 a month I pay. If you don't already have this service, please try it. Any choice of music will be on a channel for your enjoyment, and your choosing, not some pinhead that thinks that you want to hear the same song over and over again!

thank you for giving me a voice.
